New combat rule!While the core rules of Fantasy Grounds do not change, there are some additional changes to combat. First, you can now activate a combat system to simulate a one-on-one duel or other melee combat situations.Second, instead of having a hit point tracker for everyone who takes damage, you can now only track the amount of damage sustained by a single character. In a group situation, one combatant only takes damage, but the rest of the group is just as effective as if they were taking the damage.If you like combat rules, be sure to download Fantasy Grounds v6, which is available for a 30% discount.For the fifth volume of the Monstrous Characters token pack, a new combat rule is included that adds yet more depth to combat!Other additions to Fantasy Grounds 6 include multiple pages of improved character cards that include mimeograph sheets, and an improved and updated character sheet.A unique combat rule for OSRS If you are a battle-raiding player, or if you like combat mechanics and want to add a new combat mechanic to OSRS, be sure to grab the OSRS Set Combat Supplement. With no food and lots of bad language, one of these players will have to get something they want without the approval of the others, or else the party is over! The game has three different scenarios: Single player-Go solo, and get frustrated by the laziness of the kids! Two players-It's two against one, but sometimes that's more fun than it sounds. Three players-The fun comes with the combination of different scenarios, your kids, and multiple ways to play!
